The verification target activities are established in *the following scopes* :

SCOPE 1: Direct GHG emissions.

- *Emissions direct GHG emissions associated with fuel use .*

SCOPE 2: Direct GHG emissions and removals.

- *Emissions indirect GHG emissions associated with electricity consumption.*

Verification period : 01/01/2024-31/12/2024

Approach oriented to consolidation of GHG emissions : *Operational control approach.*

Base year : 2023

Emissions reduction plan

During the verification process, the Improvement Plan included in the organization's Footprint Report " Reporte_Huella_de_Carbono_Prosofia_Jun25 " for the 2nd Semester 2025-2026 period of the organization *PROSOLIA INTERNACIONAL, SL* , dated 11/06/2025, is reviewed with the following improvement actions :

- Contract 100% renewable energy in the parks and offices of PROSOLIA INTERNACIONAL, SL

Verification Criteria

To carry out the Verification of the Greenhouse Gas Emissions Inventory, criteria and information contained in the **GHG PROTOCOL standard** and in the UNE-EN-ISO 14064-3:2019 standard have been taken into account.

Importance

The required significance for verification was 5%, meaning that only omissions or errors that represent a difference of more than 5% of the total declared emissions were considered material discrepancies.

Conclusion

Taking into account all the information collected in the verification process, EQA can assure that the Carbon Footprint Report " Reporte_Huella_de_Carbono_Prosofia_Jun25 " of the organization **PROSOLIA INTERNACIONAL, SL**, dated 11/06/2025, for the period subject to verification, has no evidence to suggest that the reported emissions are not a faithful representation of the GHG emissions from its activities:

Emissions	t CO ₂ eq
Scope 1-----	389.38
Scope 2 (location based)-----	123.09
Scope 2 (market based) -----	40.25
Total (location based) -----	512.47
Total (market based)-----	429.63
